SALMAN FARIS

Data Analyst | Fixed Asset & Business Intelligence

Abu Dhabi, UAE | salmanfarisots@gmail.com | +971 50 921 8799 | LinkedIn | Portfolio Website | GitHub

PROFESSIONAL SUMMARY

Data Analyst skilled in Excel, SQL, Python, and Power BI, with hands-on experience in data cleaning, data modeling, statistical analysis, and dashboard development for business intelligence. Experienced in fixed asset management, data reconciliation, and Power Query-based data preparation. Holds a Post Graduate Diploma in Data Science and Analysis and a bachelor's in business administration. Well-suited for roles in finance, operations, or business intelligence that require both analytical depth and operational accuracy.

PROFESSIONAL EXPERIENCE

Junior Data Analyst, *ProDome Management Consulting, Abu Dhabi, UAE* **Jan 2025 – Present**

- Perform data analysis, support fixed asset management projects for major clients, including Federal government company and Ethara.
- Executed large-scale data cleaning, validation, and standardization on operational and transactional datasets for EDE using SQL and Excel, improving overall data quality and supporting pricing analysis and business intelligence reporting.
- Built a data pipeline and asset tracking application in AppSheet, improving data accessibility and preventing manual errors.
- Maintain the fixed asset register and reconcile data across acquisitions, disposals, transfers, and retirements, ensuring 100% traceability for audit purposes.
- Conduct physical asset counts covering 50000+ asset counts and perform detailed asset reconciliation to verify asset existence, condition, and location
- Apply statistical analysis and data modeling techniques to detect missing assets, duplicate records, and data inconsistencies, reducing reporting errors.
- Operated asset counting machines for physical inventory verification, then extracted and structured the resulting data using SQL queries to support accurate asset reconciliation.
- Automated asset reporting using Excel formulas, PivotTables, and VBA macros, reducing manual reporting effort and increasing reporting accuracy and turnaround time.
- Monitor data compliance with company policy and regulatory standards across the fixed asset register.

Data Analyst Intern, *Westberg International, Kerala, India* **Nov 2023 – Jun 2024**

- Collected, cleaned, and analyzed multi-source datasets using Python and SQL to support business decision-making and strategic planning.
- Performed statistical analysis and data modeling to identify trends and patterns, informing recommendations that supported forecasting and capital analysis.
- Built a content-based recommendation system using cosine similarity, improving user engagement and personalization.
- Developed a Power BI dashboard for KPI reporting, visualizing sales KPIs, product performance, and regional trends for business intelligence and management reporting, adopted by stakeholders.
- Collaborated with analysts and business teams to translate data findings into actionable insights, presentations, and stakeholder reports.
